Case Reviews	<ul style="list-style-type: none"> Δ Needle Decompression: Gunshot wounds. well written case notes, documenting treating for shock and well thought out treatment. Δ Tourniquet: Gunshot wounds. case notes were written well, no comment about case. Good job. Δ Traumatic Cardiac Arrest: MVC. Great narrative. About 28 minutes spent on scene. Possibly could have been pronounced on scene. Injury to head, torso and legs but chest intact with no deformity. Ultrasound would have helped speed up on scene time in this case and with decision to transport.
