

Protocol Change Log – 2024

Overview

This document assists the Education and Training Committee to track changes made to Protocols in 2024.

January

- Δ AOV Protocol: Changed Chest Decompression Needle Length to match Traumatic Injury and Needle Decompression Documentation; Specified Cardiac Monitoring is for I and P only in Special Considerations
- Δ Appendix F: Added Updated Supply Restock Form
- Δ Appendix K: Improved font and readability

February

- Δ De-escalation Techniques/Patient Restraint: Moved Documentation guidelines to the Documentation Guidelines Document
- Δ Chest Pain/ACS: Clarified IV access and Nitrate Administration

March

- Δ Appendix C: Added CPS and APS contact information
